

Re-homing of Animals

Despite the current lack of kennels, many animals that are surrendered to the Society are successfully re-homed to loving owners.

Sterilization service

In order to reduce the number of strays and unwanted litters of puppies and kittens, the SSPCA runs a sterilization Clinic every Tuesday and Thursday at Union Vale. The Society also offers regular Weekend Mobile Sterilization Clinics in all the districts on all the main islands of Seychelles, where as many as 70 animals are sterilized on one day. Since November 2003, nearly 6,000 sterilizations have been performed. In order to continue this very important service, we rely on donations from the public to cover the basic costs of transport, medications and materials.
